(Cross Platform developer)

Objective:

Software engineer with 2 years of experience delivering high-quality applications for organizations like HCS. Expertise in cross-platform development with Next.js, React, Tailwind CSS, and Nest.js, and strong skills in client communication, solving technical challenges, and optimizing user experiences. Proficient in mobile development using React Native, Expo, Redux, and Firebase. Committed to continuous learning and eager to contribute to a prestigious company.

Experience:

Nov 2023 - present
EdgeFirm Technologies

Software Engineer

- Improved user experiences at Edge Firm using Next.js, React, Tailwind; integrated MongoDB for real-time communication and efficient payments with MVC.
- Developed applications for HCS, ensuring client communication and supporting legacy projects to resolve complex issues.
- Optimized data and performance by developing Nest.js APIs, enhancing React, Next.js apps.
- Created wireframes and mock designs from client requests, resulting in polished interfaces and boost in user engagement
